EXPERIENCES

Golabs, Costa Rica/USA — *full-stack Software developer*

Aug 2022 - January 2024

A technology company headquartered in Costa Rica, with US headquarters based in Stamford, CT.

Their core focus is building smart technology solutions through the combination of artificial intelligence, mobile and web development for international companies based in the United States, Canada and Latin America.

Projects

Client: Finalsite | Aug 2022 - January 2024

Team up with other engineers on an Education CMS platform using several technologies such as Ruby on Rails, Backbone.js

BairesDev, USA — *full-stack Software developer*

Aug 2021 - Apr 2023

A leading Nearshore Technology Solutions company. Using tech expertise and cross-industry experience, evolving digital transformation into digital acceleration.

Projects

Client: Place Inc | Aug 2022 - Apr 2023

Place cms: PLACE is the industry's only all-in-one real estate platform providing technology and services to the top 20% of real estate agents focused on delivering unparalleled consumer experiences.

Technologies: Ruby on Rails, REST API, Sidekiq, Redis, RabbitMQ, React, PostgreSQL, Javascript

<https://place.com/>

Client: Amount | Sept 2021 - Aug 2022

Team up with other engineers on banking and point-of-sale solutions using several technologies such as Ruby on Rails, GraphQL, Sidekiq, Python, Go... On this platform, I was responsible to develop the refund process in the second generation and work through the payment processing generally. And also contribute to other modules such as the account opening module.

Full-stack developer with 8+ years of experience building scalable web applications and internal tools that drastically improve efficiency. Throughout my career I've built applications like fintech platforms, communication, e-commerce, Point Of Sale(POS), HR management, School management, Social network, etc... using PHP, Laravel, Ruby on Rails, Sinatra, Bootstrap, Javascript, React JS, React Native, Next.js, TypeScript...

SKILLS

JavaScript, React, Next.js, Node.js Redux, Bootstrap, HTML/CSS, Styled-component, TypeScript, Rspec

Laravel/PHP, Ruby on Rails, Sinatra, Node.js, Golang

PostgreSQL, MySQL, SQLite, Redis

Rest API, Graph QL

Docker, (Kubernetes)

RabbitMQ, Sidekiq

AWARDS

Best employee of NATCOM
2017

Best employee of NATCOM
2018

Main tasks executed in the project:

- Developed the refund module(ACH, Paper Check, and Debit Card).
- Investigate the payment processing
- Work on the payment gateway

I was one of the engineers that work in the payment processing on the platform, and I'm always part of the solution when they are facing any issue with a payment.

Avant Basic: a money movement platform.

Technologies: Ruby on Rails, GraphQL, Sideqik, Redis...

Payment Hub: a payment gateway that allows communication between Avant Basic, vendors, and partners.

Technologies: Ruby on Rails, GraphQL, Sideqik, Redis...

Credit Card API(CCAPI): a Platform that manages customer payments.

Technologies: Ruby on Rails, GraphQL, Sideqik, Redis
